

Extremely Profitable Betting System [Winning Rate 50%+]

This system is based on statistics.

The target is to win the number of bets needed, depending on the strategy you follow.

And the choices you make give the profitable results.

What do I mean?

The odds that a bookmaker gives for example for the home win of a team, is relevant to the possibilities of the win to be achieved.

You will see below a table of over-under statistics depending on the odds.

Odds under-over	Games	% under	% over
1.40-2.20	452	62.6 %	37.4 %
1.45-2.00	90	65.6 %	34.4 %
1.45-2.10	952	62.6 %	37.4 %
1.50-1.90	272	61.4 %	38.6 %
1.50-2.00	1445	58.3 %	41.7 %
1.50-2.05	57	64.9 %	35.1 %
1.53-1.95	101	50.5 %	49.5 %
1.55-1.85	341	52.5 %	47.5 %
1.55-1.90	1327	55.8 %	44.2 %
1.55-1.93	464	56.9 %	43.1 %
1.55-1.95	929	56.9 %	43.1 %

You understand that the low under or low over given odds, succeed in a much better percentage. For example under of 1.45 succeed almost 63%, under of 1.55 succeed almost average 56%, over of 1.50 succeed 54%, over of 1.40 succeed almost average 62% etc.

1.55-2.00	70	55.7 %	44.3 %
1.57-1.90	395	60.3 %	39.7 %
1.95-1.55	774	47.4 %	52.6 %
2.00-1.45	75	41.3 %	58.7 %
2.00-1.50	1415	46.5 %	53.5 %
2.10-1.40	68	26.5 %	73.5 %
2.10-1.45	1088	42.4 %	57.6 %
2.20-1.40	616	39.1 %	60.9 %
2.30-1.35	211	35.5 %	64.5 %
2.35-1.35	121	38.8 %	61.2 %
2.50-1.30	141	33.3 %	66.7 %

All these successful bets show to us that if you bet 100 times you may win from 54 to 63 of them if you choose odds like that. We all know that if you make flat betting, -just bet a specific amount of money to each bet- you will lose your money.

But if you follow some strategies to take advantage of the number of wins you make - more than the losses- then you will learn how to make profit.

So, we just want the possibilities to verify our choices.

And why over - under?

Some leagues and some teams are made for playing football we all want. For example, some teams in Holland Eredivisie, play to score as much goals they can. It's their mentality. If a team knows how to score, then scores. If a team knows how to keep a result, then always try to keep it. This is what they know to do.

This rule helps to raise the percentage of success that the odds by themselves try to verify.

If I can play 100 games and win 60 of them then I have profit for sure.

Let's move to the system

This system is designed to give you a standard profit after every bet.

To follow this strategy we need a win rate of 50+ % of the total number of bets.

So we have to choose odds that in the long run give us more than 50% success.

I propose to bet on sports over-under between 1.40 - 1.70 at most, unless the possibilities of the result are better and also giving a high odd more than 1.70.

Let's build a random scenario which will give us at the end a 50% success.

We start with **200\$**.

We choose the unit we want to earn per winning bet. Let's say we want **5\$** per bet.

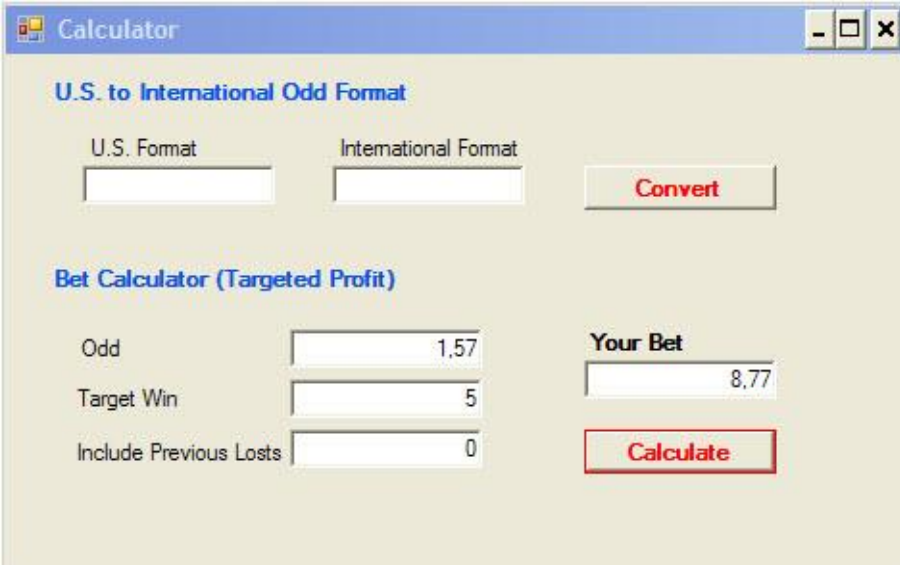

Depending our choice, the odd is different.
Let's assume that is stable and an average **1.57**.

I have created an application for Windows called [Betting Manager](#) that manages and keeps performance of our picks.
Also using a **built in calculator**, proposes our next bet.

If you want to learn how it works, click [here](#).

At the end of the guide I am going to tell you how to calculate without using the software.

1. We open the **built-in calculator** and fill the boxes.

The screenshot shows a Windows application window titled "Calculator". It contains two main sections:

- U.S. to International Odd Format:** This section has two input fields labeled "U.S. Format" and "International Format", and a "Convert" button.
- Bet Calculator (Targeted Profit):** This section has three input fields: "Odd" (with the value 1.57), "Target Win" (with the value 5), and "Include Previous Losses" (with the value 0). To the right of these fields is a "Your Bet" field (with the value 8.77) and a "Calculate" button.

We bet 8.77\$.

We lose. Now we have $200\$ - 8.77\$ = 191.23\$$

2. We open the **built-in calculator** again and fill the boxes including our previous lost bet.

Calculator

U.S. to International Odd Format

U.S. Format International Format **Convert**

Bet Calculator (Targeted Profit)

Odd Your Bet

Target Win

Include Previous Losses **Calculate**

We bet 24.16\$.

We win. 37.93\$. Real profit $37.93\$ - 24.16\$ = 13.77\$$ Now we have
 $191.23\$ + 13.77\$ = \mathbf{205\$}$

As you see with 50% success we earn our first target and all the previous lost bets.

Using the **built-in calculator** of **Betting Manager** application, we follow the next step by step bets.

Now we start from the beginning.

We bet 8.77\$

1. Win 5\$ Account : 210\$

Now we start from the beginning again.

We bet 8.77\$

1. Lose 8.77\$ Account : 201.23\$

We write our lost bet. **8.77\$**. *Calculate the next.*

We bet 24.16\$

2. Lose 24.16\$ Account : 177.07\$

We write besides our new lost bet **8.77\$** **24.16\$**

*Now we lost twice. But in the next calculation we will not include all the previous lost bets.
Just the previous one. (24.16\$)*

That is because our bets are going to become too high and we don't want to raise the risk.

The image shows a screenshot of a web-based calculator interface. The title bar says 'Calculator'. Below it, there's a section 'U.S. to International Odd Format' with two empty input fields labeled 'U.S. Format' and 'International Format', and a 'Convert' button. Below that is a section 'Bet Calculator (Targeted Profit)'. It has three input fields: 'Odd' with the value '1.57', 'Target Win' with the value '5', and 'Include Previous Losses' with the value '24.16'. To the right of these is a 'Your Bet' field showing '51.16'. At the bottom right of this section is a 'Calculate' button with a red border.

We bet 51.16\$.

3. Win. $80.32\$$. Real profit $80.32 - 51.16 = 29.16\$$.
Previous $24.16\$$ + our unit $5\$$.
Now we have $177.07\$ + 29.16\$ = 206.23\$$

We erase the last lost bet 8.77\$ 24.16\$

Calculate the next, including the lost we didn't win back. (8.77\$)

We bet 24.16\$

4. Lose $24.16\$$ Account : $182.07\$$
We write besides our new lost bet 8.77\$ 24.16\$

Calculate the next, including only the last lost bet. (24.16\$)

We bet 51.16\$

5. Win. 80.32\$. Real profit 29.16\$.
Now we have $182.07\$ + 29.16\$ = 211.23\$$
We erase the last lost bet 8.77\$ 24.16\$

Calculate the next, including the lost bet that left. (8.77\$)

We bet 24.16\$
6. Win. 37.93\$. Real profit 13.77\$. Now we have $211.23\$ + 13.77\$ = 225\$$
We erase the last lost bet 8.77\$

And we start from the beginning.

You see that in the previous 6 bets we had 50% success.

**But we won every unit of 5\$ per winning bet and
we took back all our previous lost bets.**

Now we have 225\$ and we started with 200\$.

We earned 5\$ for every winning bet.

Depending on your account, you choose your unit per winning bet.

Remember that you may have better win percentage than 50%.

These odds that verify the possibilities by themselves,
will help you to succeed.

**Betting Manager will help you to split your account and manage
with discipline.**

You may have a losing streak.

If you work only with the available bank, you will save the most
part of your account.

Learn how Betting Manager works [here](#).

Tip: If you have a losing streak and the stake become too high,

split your lost bets to parts and try to win the parts.
This is going to low the stakes.

For example : We write besides our new lost bet 8.77\$ 24.16\$

You can make it 8.77\$ 8.06\$ 8.06\$ 8.04\$

Now try to take back the last lost (8.04)

Don't be afraid.
You will also have a winning streak too.

Remember that the statistics and the possibilities work for you.

Calculator

Next Bet = (Target Win + Previous Lost Bet)/(Odd -1)

But don't forget to follow a special rule.

**Remember that is not necessary to turn your 100\$ into 10000\$
in the next 10 days.**

What would you choose?

Make money fast with high risk losing them?

or

Make money taking your time with almost zero risk?

Try to raise your account at least 30% each month.

Account 1000\$

1/2015	1300\$
2/2015	1690\$
3/2015	2197\$
4/2015	2856\$
5/2015	3713\$
6/2015	4827\$
7/2015	6275\$
8/2015	8157\$
9/2015	10605\$

10/2015	13786\$
11/2015	17922\$
12/2015	23298\$

Do you want me to continue?
Think yourself. Only 30% raise your account.

This is only with a winning rate of 50%.
The odds will give us better results. Because these are the possibilities.
You can also take some tipsters from some professionals who are reading the teams all day and can give you a 65% to 70% winning success at these odds.

I prefer mostly the one below because they are more accurate

Football Tipster - The Best Football Betting Predictions System Is Working

Below, there is an instance of that the system is working.

You can verify the integrity of the results at the following link
<http://bit.ly/betofBetManager>

(A Greek forum where the bets were placed in time with proof)

Bankroll Start 500.00€ (or \$ or £ any currency)

[The placed stakes are typical, just to see that the system is working.](#)

Using a bankroll management software for Windows. We split our bankroll into 3 parts, and work only with the first.
Below you see the bankroll after the first 11 bets.

Staking Plan

(Our target is always to earn 5.00€, unless if we want to earn back previous lost bets. Then the target is 1.00€ + the last previous lost bet, just to lower the possibility of losing a big part of our bankroll.)

30/48 WINS - 62.5% Total Success

Till now we have the progress as seen below...

The screenshot shows the 'Betting Manager 1.1 - Infobeto.mdb' window. At the top, there's a menu bar with 'File', 'Bank', 'Calculator', 'How To...', 'About', and 'Save and Exit'. Below the menu, the 'By KDR' section displays the 'Total Bank' as 581,01. The 'Available Bank' is 247,67, with 'Part 2' and 'Part 3' each at 166,67. There are buttons for 'Split', 'Win', and 'Lost'. Below this, the 'Bet Bank %' is set to 4, and the 'Max bet' is 9,91. The 'Eu Odd' is 0, and the 'Your bet' field is empty. There's also a 'Fractional Odd' field. At the bottom, there's a table with columns: Bet ID, Date, Odd, Bet Amount, Result, and Profit / Loss. The table lists bets from 38 to 48. Bet 48 is highlighted in blue, showing a win of 5,0025.

Bet ID	Date	Odd	Bet Amount	Result	Profit / Loss
48	13/3/2015	1,69	7,25	WIN	5,0025
47	11/3/2015	1,733	6,82	WIN	4,9991
